NASA SEWP VI ORDERING GUIDE

Category C Contract Holder

NASA SEWP VI
Solutions for Enterprise-Wide Procurement
Contract Holder

SEWP VI Overview

NASA SEWP VI (Solutions for Enterprise-Wide Procurement), pronounced "soup," provides ITC/AV solutions and services for Federal Agencies and their approved contractors.

The SEWP vehicle is a NASA-managed, multi-award Government-Wide Acquisition Contract (GWAC) that supports streamlined acquisition of technology and related services.

About geocgi

Geocgi is a women-owned small business providing geospatial and information technology services to mission-driven federal customers.

Core capabilities include geospatial program management, enterprise and web GIS, geospatial data services, cloud services, DevSecOps, on-site support, and technology-enabled mission support.

Contract Snapshot

Contract: 80TECH26D0356

Category: C - Mission-Based ITC/AV Service Solutions

PoP: Nov. 1, 2026 - Oct. 31, 2036

Type: GWAC

SEWP Fee: 0.34% — **included in quoted prices and not separately listed**

CAGE: 4GR40

UEI: WJSNK9P9UCY3

Fair Opportunity

In accordance with FAR 16.505(b), ordering activities must provide each awardee a fair opportunity to be considered for orders placed under multiple-award contracts, as applicable. SEWP VI Contract Holders are afforded fair opportunity at the individual order level through the procedures established for the SEWP VI program.

The SEWP Quote Request Tool (QRT) is the recommended method for conducting market research and supporting fair-opportunity procedures. The QRT can be used to solicit quotations from Contract Holders within a selected SEWP Group or from sources identified through the tool. Use of the QRT also supports the documentation of the ordering activity's acquisition and selection process.

The issuing procurement office is responsible for maintaining the rationale and supporting documentation for its order selection in accordance with applicable acquisition requirements.

How to Obtain a Quote

Use the NASA SEWP Quote Request Tool (QRT) or contact the **geo**cgi SEWP sales/quote representative:

Jason Thacker
Phone: 760-207-3671
Email: jason.t.thacker@geocgi.com

https://sewp.nasa.gov/sewpvi/dashboard/quote-request-tool/

Customers who do not already have a SEWP VI account can create one through the QRT login page – www.sewp.nasa.gov/qrt/security/login.sa

Installation, Warranty & Technical Support

Applicable installation, basic warranty, extended warranty, technical support, software support, maintenance, and other post-delivery terms will be stated in the **geo**cgi quote and/or resulting delivery order. For assistance, contact:

Jason Thacker
Phone: 760-207-3671
Email: jason.t.thacker@geocgi.com

Troubleshooting a Problematic Order

Contact the **geo**cgi SEWP VI Program Manager or designated order-support contact. Please provide the SEWP Control Number (SCN), delivery order number, customer point of contact, and a short description of the issue when available.

What's in Scope for SEWP VI?

SEWP VI is designed to provide a broad suite of Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services. Because technology is continuously evolving, SEWP processes allow Contract Holders to add new commercial technologies and IT services to their contracts in response to customer requirements.

SEWP VI is organized into three scope categories covering the ITC/AV solutions and services landscape. **Geocgi holds a Category C contract, which focuses on mission-based ITC/AV service solutions.**

Customers who would like assistance determining whether a requirement falls within the scope of SEWP VI may submit an overview and/or Bill of Materials (BOM) to **help@sewp.nasa.gov** for review and feedback.

CATEGORY A ITC/AV Solutions	**CATEGORY C** **Mission-Based ITC/AV Service Solutions**
CATEGORY B Enterprise-Wide ITC/AV Service Solutions	Focused technical services tied to a defined agency or program mission. • Security engineering and architecture • Cyber operations and threat intelligence • Penetration testing and information assurance • Cloud engineering and security • Software and application services • Data engineering, analytics and AI • IT operations, technical support and training

Typical Ordering Process

1	**Define the requirement** - The Federal customer identifies the mission requirement and confirms that the requirement is within SEWP VI scope.
2	**Conduct market research / request quotes** - The customer may use the SEWP Quote Request Tool (QRT) to conduct market research and obtain quotes in accordance with applicable fair-opportunity procedures.
3	**Prepare the Purchase Request** - The end user prepares the agency Purchase Request (PR) and includes the required funding and acquisition information.
4	**Issue the Delivery Order** - The issuing agency procurement office awards and issues the Delivery Order (DO). Any valid Federal Agency delivery-order form and associated order number may be used.
5	**SEWP processing** - The NASA SEWP Program Management Office reviews, processes, tracks, and forwards the order to the selected Contract Holder.
6	**Performance and order support** - **geo**cgi performs the ordered services and provides order status, support, and post-delivery assistance in accordance with the delivery order and SEWP requirements.

Scope questions: Federal customers may send an overview and/or bill of materials to help@sewp.nasa.gov for SEWP scope review.
